

QUALITY POLICY

At PIGASOL AGRUPACIÓN, the term QUALITY means the ability of our organization to satisfy the requirements of our clients as far as services of multiplication of hybrid and self-pollinated seeds are concerned.

The achievement of the above-mentioned QUALITY will be possible by means of implementing the requirements of ISO 9001:2015 standard and the applicable legal regulations in all sectors, thus conforming our Quality Management System, with the aim to operate under criteria of effectiveness, efficiency, and continuous improvement.

The following general objectives are established as guidelines of the aforementioned system:

- Obtain our clients' maximum possible satisfaction, providing products and services that meet their quality expectations and terms of delivery.
- Promote staff training with the purpose of optimizing their levels of competence in the tasks carried out, as well as their knowledge of the implemented Quality Management System.
- Maintain a process of continuous improvement of the organization valid.
- Establish mutually beneficial relationships with our suppliers, evaluating their products and services in view of a better support to our processes.

These objectives are periodically assessed through the analysis of indicators, which allow for their follow-up and the definition of goals oriented towards the optimization of the company's organization processes.

This Department supports and revises periodically the system, and requests from all the staff their collaboration and compliance with the guidelines provided within the frame of the respective competencies and responsibilities.
